

Memmingen, Bavaria, Germany

Aircraft Mechanic (female, male)

Aircraft Maintenance for business jets is its own world – and we are in the thick of it! Our modern facilities at Memmingen Airport have everything for maintenance, overhaul and a whole range of other technical services for of Textron Citation aircraft.

With the latest software and miscellaneous high-quality tools, we are at the top of efficient aircraft maintenance – albeit as a small entity.

Your Profile:

- You are EASA Part-66 or similar trained and are looking for challenging and diverse job in the region.
- You have just completed your apprenticeship, or you already have a few years' experience.
- You are versatile and you want to take responsibilities for technical services on the customer aircraft.
- You like working in a small team with the latest software and modern workplace methodologies.
- You are capable of reading and understanding aircraft manuals.
- Understanding some German is beneficial but not required.
- Obtaining the German Security clearance, however, is a requirement.

Our Offer:

- Continuous advancement and training.
- Modern work environment.
- Interesting projects using high-tech tools and mechanisms.
- Flat hierarchy and fast decision-making processes.
- Flexible work- and overtime-account arrangements.
- Special personal considerations possible.
